Project

Field(s) Interdisciplinary/ Cultural management/ Lifelong learning/ Creative industries

We would like to be a partner on a project which could include Lifelong learning in its activities. We are a local educational and cultural institution founded by an urban municipality of the city of Belgrade. In regards to adult education, we provide a variety of courses such as tailoring and sewing, beauty courses (cosmetics, pedicure-manicure, hairdressing, make up etc.) language courses, and basic computer classes.

Description Our idea is to develop new courses so students can have an opportunity to update and develop their knowledge and skills for creative industries. In addition, we want to get involved in a project whose objective is audience development. Furthermore, with our capacity building, we could provide new courses relating to the empowerment of other cultural centers in Belgrade.

Regarding cultural activities in which we have experiences there are art exhibitions, rock concerts, readings, different sorts of workshops, small

festivals and, starting this year, we also house a student theater. We have a gallery and concert hall, as well as professional classrooms that are designed for above mentioned courses.
